

Team Expectations and Policies

Please read each policy and complete the form to complete your team registration.

Team Tenets:

I Will:

1. Participate in an active leadership role producing a measurable result or develop leadership skills through action for all members of the team.
2. Participate in fundraising and entrepreneurship efforts.
3. Help promote equity, diversity, and inclusion within our team, FIRST, and our local communities by encouraging people of all genders, faiths, and backgrounds to join the team.
4. Participate in community outreach events.
5. Actively be part of a sub-team and complete objectives and deliverables on or ahead of schedule.
6. Develop programs and inventions to help all FIRST Robotics teams, spreading the *FIRST* message in ways that are effective, scalable, sustainable, and creative.
7. Check daily emails / all communications (Email/Slack) and respond in a timely manner.
8. Always be mindful and respectful to coaches and mentors that have volunteered their time to help the team succeed and to guide you with knowledge and expertise. Thank them often!

Meeting/Outreach Etiquette:

Meeting Norms:

1. **Show up on time and come prepared:** Be prompt in arriving at the meeting and in returning from breaks. Be prepared to contribute to achieving the meeting goals. Come to the meeting with a positive attitude.
2. **Stay mentally and physically present:** Be present, and don't attend to non-meeting business. Listen attentively to others and don't interrupt or have side conversations. Treat all meeting participants with the same respect you would want from them.
3. **Contribute to meeting goals:** Participate 100% by sharing ideas, asking questions, and contributing to discussions. Share your unique perspectives and experience, and speak honestly. If you state a problem or disagree with a proposal, try to offer a solution.
4. **Let everyone participate:** Share time so that all can participate. Be patient when listening to others speak and do not interrupt them. Respect each other's thinking and value everyone's contributions.
5. **Listen with an open mind:** Value the learning from different inputs, and listen to get smarter. Stay open to new ways of doing things, and listen for the future to emerge. You can respect another person's point of view without agreeing with them.
6. **Think before speaking:** Seek first to understand, then to be understood. Avoid using idioms, three letter acronyms, and phrases that can be misunderstood. It's OK to disagree, respectfully and openly, and without being disagreeable.
7. **Stay on point and on time:** Respect the groups' time and keep comments brief and to the point. When a topic has been discussed fully, do not bring it back up. Do not waste everyone's time by repeating what others have said.
8. **Attack the problem, not the person:** Respectfully challenge the idea, not the person. Blame or judgment will get you further from a solution, not closer. Honest and constructive discussions are necessary to get the best results.
9. **Close decisions and follow up:** Make sure decisions are supported by the group, otherwise they won't be acted on. Note pending issues and schedule follow up meetings as needed. Identify actions based on decisions made, and follow up actions assigned to you.
10. **Record outcomes and share:** Record issues discussed, decisions made, and tasks assigned. Share meeting reports with meeting participants. Share meeting outcomes with other stakeholders that should be kept in the loop.
11. **NO Politics, personal agendas, biases, prejudices, divisive language or actions:** Note that bad language such as cussing and political discussion or

comments, personal agendas, biases, prejudices, divisive language or actions distracts for our work of STEM, Robotics and Outreach and is not tolerated.

Outreach/Event Norms:

1. **Wear provided team uniform** (team polo and blue jeans) to all team sponsored outings and events. Exceptions may be made on a per event basis.
2. **Show up on time and come prepared.** Be prompt in arriving at the event and in returning from breaks. Be prepared to contribute to achieving the team goals. Come to the event with a positive attitude.
3. **Stay mentally and physically present.** Be present, and don't attend to non-event business. Treat all participants with the same respect you would want from them. Participate by interacting with the public and others when appropriate.
4. **Contribute to event goals**
Participate 100% by sharing ideas, asking questions, and contributing to presentations. Share your unique perspectives and experience, and speak honestly.
5. **Let everyone participate**
Share time so that all can participate. Be patient when listening to others speak and do not interrupt them. Respect each other's thinking and value everyone's contributions.
6. **Think before speaking**
Seek first to understand, then to be understood. Avoid using idioms, three letter acronyms, and phrases that can be misunderstood. Focus on providing information and content that forwards the team's goals and objectives.
7. **Stay on point and on time**
Respect the groups' time and keep comments brief and to the point. Do not waste everyone's time by repeating what others have said.
8. **Record outcomes and share**
Record event outcomes and summaries. Share event outcomes with other stakeholders that should be kept in the loop.

Attendance:

In order to maintain active participation and good standing in Robotics, all students must be in attendance as outlined:

Fall Semester: Pre-Season (August - December)

1. Attend all Mandatory Monday meetings starting at 3 PM and ending between 4 and 5 PM.

2. Attend all mandatory events
3. Complete all sub-team deliverables
4. Tool, safety, and CAD certifications completed.

Spring Semester: FRC BUILD SEASON (January - April)

1. Attend all Mandatory Monday meetings starting at 3 PM and ending at 5 PM.
2. Meet the required hours for build season.
3. Attend the Salt Lake Regional. Out of state regionals are STRONGLY recommended, but not required.
4. Complete all sub-team deliverables

NOTE: Students need to be on time. Five tardies will be considered as one absent. Tardies are considered more than 5 min late. Students not meeting their attendance obligations will be put on probation which removes you from participating in outside events.

Schedule and Events Calendar

We meet every Monday from 3:00 PM - 5:00 PM during Build Season, and members are expected to meet 5 hours a week (on average), during build season, outside of scheduled Monday meetings to complete deliverables on time. A detailed schedule will be provided when dates are made available to us.

Dual Contract:

Can I play a sport or do another activity on campus while in Robotics? Yes! Many of our students are involved in a variety of activities and sports (football, band, swim, track, and so on.) Make sure that you fill out a dual contract and have your robotics mentor and other program leader sign the form, turned into each coach/leader for approval with the date(s) that are in conflict only and how you intend to make up the date(s) and hours missed. A dual contract means you will have to make up the time you are not there. It is to provide the flexibility with schedules for you to do both programs. If you have a conflict where you are missing almost every Mandatory Monday, the dual contract will not apply, and you will not be allowed to participate in robotics. You will have to choose.

Participation:

Cleanup:

All students are required to clean up the facilities. Classrooms, patios, and shops will need to be cleaned each day we meet within the last 10 minutes of class. That will occur by Sub-Team on either a rotating basis or by use; whichever is deemed appropriate.

Classrooms: Turn off computers, clean computer areas and floor of trash, vacuum floor, and push in chairs.

Machine Shop: In the Robotics Lab, put away all tools in their proper place, lock tool cabinets, sweep around power equipment, sweep floors, and put away all materials.

Individual Expectations:

All students are expected to be working when they are in the lab. Students should be on task according to what was assigned to them. You should always be working on something related to your sub-team task, a task by a student leader, a mentor, or a teamwide task. If you are finished and have nothing to do, be 'proactive' and communicate with your leaders for a task that you could help the team out with. Preferably you communicate with your Sub-Team Captain before going to a mentor, student leader, or captain. The expectation is for you to go out of your way to help the entire team.

Sub-Team and Leadership Meetings:

It is required that all Sub-Teams have their own leadership meetings outside of class time to be prepared for reporting out and evaluating the performance of their Sub-Team according to goals. All student leadership will have an entire team leadership meeting prior to the Mandatory Monday meetings to be prepared in leading the team at the meeting and focus on goals. The captains will prepare and lead this leadership meeting. Attendance will be taken by the student leaders and provided to the Mentors.

Probation from Outside Events:

All students will need to maintain a 2.0 average (aligned with school policy) to attend any campus field trip, demonstration, conference, or competition, and so forth. Grades will be determined by the 9 week grading period, and semester grades for approval. Any student not meeting the grade requirement will be on probation which means that they will be denied for the next 9 week term to attend any outside of school events until their grades have returned to a 2.0 average GPA. Any teacher for any reason can deny a student attending any outside event. It is important to keep up your grades so that you are in good standing with the teacher and class, to attend outside events.
